Sourabh K T

Full Stack Web Developer

Professional Summary

Highly skilled full-stack web developer with expertise in Node.js, Express.js, MongoDB, and React.js. Proficient in JavaScript and experienced in RESTful API design and problem-solving. Strong communicator, collaborator, and adept at integrating frontend and backend components. Stay up-to-date with latest web development trends and best practices. Proactive, self-motivated, and thrive in both independent and team-based work environments.

Projects

Skill Mentor   Live Demo Link   Github Repo Link

JavaScript   HTML   CSS   Node.js   Express
MongoDB   Google Auth   Razor pay

- Developed a web-based appointment booking system for a tutor using JavaScript, HTML, and CSS.
- Implemented Google Auth for user sign-in and sign-up functionality.
- Utilized Razorpay for payment gateway integration.
- Created features for users to book slots, find teachers, and manage their profiles.
- Responsible for developing the home page, slot booking page, and profile photo uploading functionality.

Zomato Chronicles: The Great Food Fiasco   Live Demo Link

Python

- Developed a robust terminal-based application using Python's core concepts and generative AI
- Utilized 'Tinker' GUI tool for better user interface
- Improved efficiency in menu management, order tracking, and error handling
- Successfully completed the project in just 3 days

Macaw   Live Demo Link   Github Repo Link

HTML   JavaScript   CSS   MongoDB   Express
Node.js

- Developed a clone of JCREW as an e-commerce website for fashion apparels.
- Implemented features such as login and signup functions, cart and payment page, individual product page, sorting and filtering functions, and responsiveness.
- Took responsibility for planning and executing schema design and UI design.
- Worked individually on the project.
